

ET158

ELECTRIC PALLET TRUCK

Ideal for high-density warehousing, retail supply chain back rooms, and manufacturing stock-rooms where agility and throughput matter, the ET158 excels in tasks such as pallet loading/unloading, staging goods for dispatch, and maneuvering in tight corridors. Its design supports operators working in compact storage zones or tail-lift delivery environments, making it a versatile tool for diverse industries.

Features

Robust 1.5-tonne load capacity

With a rated capacity of 1,500 kg, the ET158 handles standard pallet loads with ease. Its construction is designed to ensure stability and performance under sustained use.

Compact design and tight turning radius

With a turning radius of approximately 1,403 mm and a width of 685 mm, the ET158 manoeuvres easily in narrow aisles and tight spaces where larger trucks struggle.

Efficient battery system

Powered by a 48 V battery (10 Ah standard, optional 20 Ah), the ET158 offers reliable runtime for typical shifts and supports efficient operations without frequent downtime.

Low-weight, versatile design

At just 115 kg (including battery), the ET158 is lightweight for its class while offering pedestrian operation, making it flexible for both warehouse and delivery-zone use.
